OBJECTIVE

Data Science student at Umm Al-Qura University, passionate about turning data into actionable insights that drive real-world impact. Experienced in data analysis, visualization, databases, and foundational machine learning, with proven teamwork, leadership, and communication skills gained through academic projects and university initiatives.

EDUCATION

UmmAl-QuraUniversity – College of Computing (2023 – Present)
Bachelor in Data Science - GPA (3.9 / 4.0)

SKILLS

Technical Skills	Soft Skills	Languages
• DataVisualization (Tablue) • Database Systems (SQL) • Programming: Python (Machine Learning ,Statistical Analysis , Data Cleaning • Tools: GitHub,Jupyter Notebook, Excel Microsoft Office	• Analytical Thinking • Problem Solving • Leadership • Time Management & Self-learning • Teamwork & Collaboration • Flexibility & Adaptability	• Arabic • English

TECHNICAL PROJECTS

Student Performance Data Analysis

- Analyzed data for more than 5,000 students to identify academic performance patterns using machine learning techniques such as Regression, Classification, Clustering, PCA, and Anomaly Detection. Through this project, gained strong analytical and problem-solving skills and improved the ability to interpret and visualize insights using Python, Pandas, and Scikit-learn.

Smart Makeup Identification Using AI

- Developed an AI model to analyze facial features and recommend suitable makeup products. The project included personalized product recommendations, tutorial videos, purchase links, and notifications, enhancing skills in image analysis, data processing, and user experience design.

Restaurant Management System

- Designed and implemented a relational database with ERD, schema, keys, and SQL queries using PostgreSQL. This project strengthened understanding of database structures, table relationships, and efficient data management techniques.

VOLUNTEERING

Team Leader – Manar Initiative (Data Science Team at UQU) (2024 – Present)

- Managed event logistics and coordination for 100+ attendees.
- Led data science sessions and workshops to simplify complex topics and support students in applying key concepts. Contributed to promoting data literacy and fostering a collaborative learning environment.

Organizing Committee Member – University Club (2023 – Present)

- Organized technical events and workshops, managed logistics and coordination, and enhanced leadership and teamwork skills through active participation.
